Engine Air Replacement Filters for Fleetguard® OptiAir™ Air Cleaners

Fleetguard® and OptiAir™ are registered trademarks of Cummins, Inc.

The New
Standard

Superior performance and proven protection for heavy-duty diesel engines

Donaldson's new line of high efficiency air filters may look a little different out of the box, but they're specially designed to fit Fleetguard® OptiAir™ air cleaner housings used in both on- and off-road applications.

This filter's unique sealing system incorporates a saw-tooth design that compresses to cushion and hold the filter in the ideal position, providing a secure seal – even in the most severe environments.

Packed with proven technology

Equipped with Donaldson's industry-shaping RadialSeal™ system, advanced media, and stable structural support, these new air intake filters are built to perform and provide effective engine protection, in a wide-range of conditions.

Old

New Appearance. New Design.

New

Donaldson invented air filters for heavy-duty engines – now we offer a new and improved heavy-duty design for Fleetguard® OptiAir™ air cleaners.

Fleetguard® and OptiAir™ are registered trademarks of Cummins, Inc.

Advanced technology delivers complete engine protection

Vibration Resistant

Innovative dual compression saw-tooth design incorporates a combination of soft and hard urethane that generates high levels of compression – maintaining secure RadialSeal integrity. Filter resists movement (even under heavy vibration) and delivers sure sealing under the most severe conditions.

RadialSeal™ Design

Proven sure-fit Donaldson sealing system creates a reliable, vibration-resistant interface between the air cleaner and the filter. Slides easily on and off the outlet tube during servicing, making removal and replacement fast and simple.

Fully Encapsulated Pleat Ends

Pleat ends are fully enclosed in urethane, providing a durable, leak-resistant seal, while maintaining airflow that meets OE filter performance.

Rigid Structural Support

Metal liners* protect filters from damage or collapse in humid conditions, heavy vibration applications, or heavy dust-loading environments. The rugged structure also protects the media from damage during servicing.

* Smaller filter sizes have outer liners and the larger filter sizes have inner and outer liners.

High-efficiency Cellulose Media

Media is specifically designed to perform across a wide range of heavy-duty diesel engine applications.

Donaldson Aftermarket Filter Warranty

YOU HAVE A CHOICE

You can always choose top-quality Donaldson filters designed specifically for your engines and equipment and – as long as you change them according to the engine manufacturer's recommendations – using Donaldson filters **will not** void your engine manufacturer's warranty.

See Brochure F110064 for complete warranty details on all Donaldson products.
